

An Invitation To Invest

**A World First Hydration & Health Solution for Schools -
Revolutionizing Student Wellness Through AI Technology**

by Leicester Chatfield, Managing Director &

Founder

Hydrascan - VMI Subsidiary

The Challenge & Opportunity

Rising Health Crisis

Child obesity, dehydration, and lifestyle-related health issues are rising rapidly in schools globally.

Global Market Potential

World-first technology with immediate commercial rollout and strong government support for expansion.

Lack of Solutions

Most schools lack the tools or comprehensive data to address these health challenges effectively.

Revolutionary Solution

Hydrascan offers an integrated AI-driven hydration and wellness platform starting in UAE schools.

Hydrascan Solution Overview

AI-Driven Health Platform

Hydrascan deploys smart hydration machines across schools, delivering free water and healthy drinks via RFID-enabled stainless-steel bottles that track each student's hydration and health metrics in real-time.

Early Detection Technology

Monthly retinal scans detect early signs of health risks such as diabetes and heart disease, enabling early intervention and prevention.

Data-Driven Wellness

Real-time health data allows authorities to improve national wellness programs while providing parents with crucial health insights.

Key Features & Technology

Smart Bottle Technology

- RFID chips monitor each student's water intake
- Track beverage consumption patterns and preferences
- Encourage healthy hydration habits through gamification

AI Retinal Scanning

- Monthly scans detect early health issues
- Identify diabetes and heart disease risks
- Alert parents before symptoms appear

Health Data Analytics

- BMI tracking and obesity trend monitoring
- Real-time health data for authorities
- Anonymized data for national wellness programs

Revenue Model & Market Opportunity

\$8

Per Student Monthly

1.5M

UAE Students Reached

35K

UK & Europe Schools

30-45x

P/E Ratios

Health Data Sales

Recurring revenue from DHA, parents, and insurers for anonymized health scan data and insights.

- USD \$8 per student monthly revenue stream
- Scalable data insights by region and demographics
- Previously unavailable health data for authorities

Media & Advertising

Vending machines function as digital billboards with remote access for instant content updates.

- Reach 1.5 million UAE students daily
- Remote video and static content management
- Premium advertising rates for captive audience

Global Expansion

Strategic alliance signed for rapid international rollout with strong capital market positioning.

- 35,000 schools across UK and Europe contracted
- Planned Nasdaq listing for expansion funding
- AI health-tech companies trading at premium multiples

Investment Offer & Strategic Partnerships

Strategic Partnership Network

- Abu Dhabi Government supporting local manufacturing
- Dubai Health Authority purchasing health data
- Ministry of Education supporting UAE school rollout

Government-Backed Investment Opportunity

- Seeking US\$10 million for 25% equity stake
- World-first health-tech with immediate commercial rollout
- Strong government support and strategic partnerships

Why Invest in Hydrascan

First-Mover Advantage

Secure your stake in a world-first health-tech company with proven technology, government backing, and immediate commercial rollout across UAE schools.

Proven Technology

- AI-driven health diagnostics with government support
- Recurring, high-margin data revenue streams
- Strong social impact aligned with UAE Vision 2030

Growth Potential

- Global scalability across GCC, UK, Europe, USA
- Premium P/E ratios of 30-45x for health-tech
- First-mover advantage in AI health diagnostics
